

No. 14045

Supreme Court of Illinois

Blackman

vs.

Phelps

Blackman

Phelps.

I have examined the record & all the arguments with particular care & can find no question but that there can be any doubt unless it be about the admission of the certified copy of the original articles of association to prove that the defendant was a stockholder. The articles of association were acknowledged by the defendant & two other directors according to the statute before the county judge of Bond county whose character as judge is duly certified by the Clerk of that county. And filed with the Secretary of State and a copy of these articles certified by the Secretary to be correct is offered & admitted in evidence to which the defendant's name appears as a subscriber to stock. Was this competent to prove him a stockholder or should the original articles have been produced & his signature proved?
